A DOUBLE TRIANGULAR **AFFAIR**

By SARAH BAXTER

him constantly in hot water. As it is entire system is strengthened to meet the nature of a bird to pour forth Dr. Williams' Pink Pills are useful for melody, so was it in Ned's nature to all women but they are particularly valumake love.

Finally he received a note from Miss Belle Stevens, a girl to whom he had so ignominiously treated. She scorned to sue for breach of promise, and the eyes and color to cheeks and lips.

the only method left her of punishing Write now to the Dr. Williams Medithe only method left her of punishing him was to act just as if she were a man and use a man's methods. She was in some respects a new woman and had lost her grandfather in a duel. These facts taken together, she had decided to give him his choice between CHURCH UNION WOULD keeping his promise and giving her satisfaction.

The most natural thing for Ned to do was to inform Miss Marian Jones, Calls the Regular Annual Display of the last girl to whom he had given his heart, of the alternative that had been offered him by her rival, with a request that she show him a way out of the difficulty. He sent Miss Jones the letter he had received from Miss Stevens, whereupon Miss Jones, who was a militant suffragette, returned it with an indorsement written in a bold hand on the face of it to the effect the Prevention of Easter Desecration that if he did not keep faith with her (Miss Jones) she, too, would demand would pledge themselves not to wear new articles of clothing, beginning with satisfaction under the code.

GOOD POTATO SEED

Ten Per Cent Increase in Yield Might Be Expected, Says the Department of Agriculture.

should pay particular attention to seed potatoes, cautions the department of agriculture, and the use of high grade seed should increase the returns from the potato crop of the country by many millions of dollars. A conservative estimate of the increase that might be expected from the use of high-grade seed is certainly not less than 10 per cent. Such an increase based on the average production of the past five years would amount to over 34,000,000 bushels, having an approximate value of \$21,000,000. Of the many causes which operate to produce a low average potato yield in this country, pure seed is an important one. American potato grower pays too little attention to his seed potatoes. The European growers, especially those of Great Britain and Germany,

led to the differentiation of the potato industry into seed and crop specialists. New York, March 30.—Ten of the 12 The seed specialist makes a business of trial jurors who found the four gunmen guilty of the murder of Gambler Her- crop specialist produces a high grade crop specialist produces a nigh grade table potato. 1913 ALUMINUM PRODUCTION

Showed Marked Increase Over That of Previous Year.

The demand for aluminum in the United States in 1913 showed a steady and rapid growth, according to W. C. quently moved) pieces of furniture Phalen of the United States Geological Survey. This resulted in a marked increase in the production of bauxite or aluminum ore, the output of which, according to final survey figures, was 210,-241 long tons, valued at 8997,698, an increase of 50,376 long tons, or 31.5 per cent and \$228,766 or 29.8 per cent, respectively, over the figures for 1912, This growth of the aluminum induser in a second tub of hot water and am- try has been marked by healthy expansions and improvements in existing second time and hang out in the sun- plants, the commencement of work at a new plant in the spring of 1914, and progress in the work on new power sites where largely increased hydro-electric power for use in the reduction of the metal will be in operation during the next few years.

> The states which produced bauxite vere, as usual, Alabama, Arkansas, Georgia, and Tennessee. Arkansas led in 1913, its output exceeding that of the previous year. The ore mined in that state came from both Saline and Pulaski counties. The production in Tennessee/ increased substantially. The ore mined in this state came from the Mission ridge deposits near Chattanooga, and from the new mine of the National Bauxite company near Keenburg, Carter county. The production in both Georgia and Alabama declined. In the former state the decline was slight, but in Ala-In Georgia cinity of Rome, Floyd county. In Ala-

bama ore came from the vicinity of
